

Apocalypse
(Rewrite of Endgame)
Fan fiction by Danny Wheeler

Part 1:

The tower of the Doomsday Machine was complete. All Eggman needed to do was lure the heroes of the Mobius of the Sky to battle. He sent Metal Sonic to attack. He did so. During the fight, Metal Sonic killed Princess Sally. Sonic soon became enraged and vowed to take down Eggman once and for all! While Sonic hunted down Eggman in the Mobius of Darkness, Knuckles learned that there was a way to bring back the dead, and went to find a way.

The Mobius of the Sky mourned their fallen princess, while Eggman prepared the Badniks and Super Badniks for battle, and he himself readied the Doomsday Machine! But he did not know that Eggman was soon to meet his Waterloo!

Part 2:

Knuckles soon found the Spirit World and found the lord of the dead, Sibuna (that's "Anubis" spelled backwards, and he does look like Anubis!). Anubis provided this challenge to revive Sally: Defeat his Death Knight, and Sally would be resurrected! Knuckles took the challenge. Knuckles fought with all his might. Knuckles barely won the fight, and Sally was soon brought back to life.

Sonic, meanwhile, prepared to face off with Eggman. He had gathered seven Chaos Emeralds and Fifty Rings. He also faced Metal Sonic. This time around, Metal Sonic was not going to retreat. This time, he fought to the death. Sonic soon destroyed Metal once and for all, and Sonic continued to Robotropolis.

Part 3:

After Sally was resurrected, she and Knuckles soon found a road back to the Land of the Living. Once that was done, they soon entered Mobotropolis. The people were awed as they saw their princess alive and well. But then Sally became worried when she learned that Sonic was down in the Mobius of Darkness, still thinking she was dead.

Sonic had just entered the Doomsday Tower and searched out for Eggman, who was also called Robotnik! The final battle was about to commence!

Part 4:

Sonic found Eggman/Robotnik in his war room. The mad scientist was about to destroy South Island, but Sonic interrupted him. He soon changed into Super Sonic and fought! The fight was long and hard, but Super Sonic soon sent Eggman into the reactor, where he and the entire machine exploded. Sonic survived the explosion, the Badniks and Super Badniks were changed back to their true living selves, and the Mobius of Darkness was changed to Mobius of the Center.

Sonic still was saddened by Sally's death... until he returned to see that Knuckles had indeed brought Sally back to life. The people soon had a big celebration in the Mobius of the Sky. Eggman, also called Robotnik, had been destroyed forever... or is he?
